

Water

Q1. Where do we get water from?

Ans. We get water from rain, rivers, wells and ponds.

Q2. Do you water the plants regularly?

Ans. Yes. We should water the plants regularly as all living things need water.

Q3. Name two activities in which water is needed.

Ans. We need water for cooking food.

We need water for cleaning,

washing dishes and clothes.

Q. Suggest two ways of saving

water.

Ans. We can save water by closing

the taps properly.

We can save water by fixing

leaking taps and pipes.

D. VALUE CORNER

Tick (✓) the pictures that show 'wasting' water.

Activity

A. Make a paper boat and place it in a tub of water. Blow gently. The boat will float. Take a small toy car, and place it on the water. What happens?

Some things float on water. Some things sink. Name some things that float on water : ... Wood, balloon, plastic bottle, boat ...

sink in water : ... Coins, spoon, stones, marble, mobile phones ...

B. We get water from different sources. They are given below in jumbled form. Arrange them and make a suitable word.

1. V E R I R R I V E R

2. A I N R R A I N

3. L L E W W E L L

4. N D O P P O N D

C. Draw and colour any one source of water on a chart paper. Then, pin it up on your class board.

Life Skill

List three ways, by which we can save water.

1. Close taps properly

2. Fix leaking taps

3. Turn off the tap while brushing teeth and washing clothes.
