OUR EARTH, MOON AND STARS

The Earth: The only planet in the Solar System where life has been found.

The Stars: They twinkle and can be seen in the night sky.

Sounds Amazing

The first man to step on the Moon was Neil Armstrong.

The Moon: It does not have any light of its own. It reflects the light from the sun.

Learn about our earth, moon and stars
Identify our friends in the sky and write their names in the blanks. Take help from the help box.

Help Box

a Stars

b Sun

c Moon
